SUMMARY

Technical Support Analyst at ADP with hands-on experience in SQL, Python, Splunk, data validation, and root cause analysis. Skilled in developing complex SQL queries, analyzing production data, and resolving data inconsistencies. Experienced in building data analytics and Machine Learning projects using Python and Power BI, with hands-on exposure to PySpark and data engineering concepts.

TECHNICAL SKILLS

- **Programming Languages**: Python, SQL
- **Python Libraries**: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
- **Data Engineering**: PySpark, Spark SQL, Databricks, Delta Lake, ETL
- **Data Visualization**: Power BI, DAX
- **Databases**: PostgreSQL, MySQL
- **Tools Concepts**: Splunk, Streamlit, Exploratory Data Analysis (EDA), Machine Learning, Medallion Architecture.

WORK EXPERIENCE

Technical Support Analyst — **Automatic Data Processing (ADP)**
Hyderabad, Telangana — Dec 2024 – Present

- Investigated 400+ production support tickets using SQL queries and Splunk log analysis to troubleshoot HCM-related production issues.
- Developed complex SQL queries across multiple HCM domains, including Core HR and Payroll, to extract, validate, and generate customized client-requested reports.
- Performed root cause analysis (RCA) by reviewing Designer configurations, validating Data Contracts and Data Queries, and analyzing system logs to identify data inconsistencies and production issues.
- Collaborated with cross-functional teams to troubleshoot and resolve incidents within agreed SLA timelines, ensuring timely issue resolution.

PROJECTS

SupportIQ – AI-Powered Customer Support Analytics Platform

- Built an end-to-end Data Engineering and AI platform processing 1.2M+ synthetic support tickets using PySpark/Spark SQL, implementing data profiling, cleaning, transformation, and a Bronze–Silver–Gold architecture with Delta Lake.
- Developed a Power BI analytics dashboard for support KPIs and an ML pipeline for SLA prediction, evaluating Logistic Regression, Decision Tree, and Random Forest models.
- Built a RAG-based AI Support Assistant using MiniLM embeddings, hybrid semantic + keyword retrieval, and Llama 3.2 via Ollama, and deployed the interactive application on Streamlit Community Cloud.
- **Tech Stack:** Python, PySpark, Spark SQL, Databricks, Delta Lake, Power BI, Scikit-learn, Sentence Transformers, RAG, Llama 3.2, Ollama, Streamlit.

E-Commerce Sales & Customer Behavior Analytics

- Developed an end-to-end analytics solution using the Olist E-Commerce dataset to analyze sales performance, customer behavior, and delivery efficiency using PostgreSQL, Python, and Power BI.
- Cleaned, transformed, and analyzed data using Python and SQL to identify revenue trends, top-performing states, payment preferences, and order performance.
- Built a 4-page interactive Power BI dashboard with KPI cards, DAX measures, charts, and slicers for business analysis.
- **Tech Stack:** PostgreSQL, SQL, Python, Pandas, Power BI, DAX.

HCM Employee Attrition Analytics & Prediction System

- Developed an end-to-end employee attrition analytics and prediction solution using Python, SQL, Machine Learning, Power BI, and Streamlit.
- Performed data cleaning, EDA, and feature engineering to identify key attrition factors and built interactive Power BI dashboards to visualize workforce trends.

- Trained and evaluated Logistic Regression, Decision Tree, and Random Forest models, achieving 86.05% accuracy and 0.81 ROC-AUC with Logistic Regression; deployed the model via Streamlit for attrition risk prediction and HR insights.
- **Tech Stack:** Python, SQL, Pandas, Scikit-learn, Power BI, DAX, Streamlit.

Loan Approval Prediction System

- Developed a machine learning solution to predict loan approval decisions using applicant and financial data.
- Performed data cleaning, feature encoding, EDA, and compared Logistic Regression and Decision Tree models using Accuracy, Precision, Recall, F1-score, and Confusion Matrix.
- Built an interactive Power BI dashboard with KPIs, DAX measures, charts, and slicers to analyze loan approval patterns and applicant profiles.
- **Tech Stack:** Python, Pandas, Scikit-learn, Power BI, DAX.

INTERNSHIPS

Full Stack Developer Intern — **Amicure Health**
Guwahati, Assam — July 2024 – Sept 2024

- Developed a full-stack web application using React, Node.js, PostgreSQL, and Docker while contributing to Bahmni lab report customizations.

Software Development Intern — **National Informatics Centre (NIC)**
Guwahati, Assam — Jul 2023 – Aug 2023

- Acquired practical experience with ICT tools and e-Governance applications while analyzing CPGRAMS data and supporting client-server application development.

Python Machine Learning Intern — **NIELIT**
Guwahati, Assam — Aug 2022 – Oct 2022

- Developed a Heart Disease Prediction model using Python by preprocessing data, training multiple machine learning algorithms, and evaluating model performance.

EDUCATION

- **Assam Engineering College** — Guwahati, Assam
  Bachelor of Technology - Computer Science and Engineering — GPA: 8.0 — *2020 – 2024*

CERTIFICATIONS

- SQL – Introduction to SQL with MySQL (Jun 2026)
- Python Data Analytics with Top Libraries (Jun 2026)
- Introduction to Programming Using Python (May 2026)
- Microsoft Power BI – Beginner to Pro (Jun 2026)
- PySpark: Learn Apache Spark with Python (Sept 2026)

  All certifications completed through Udemy.
